CHICKEN IMPORTED IN 2016 (tonnes)

## Recent updates to "Deforestation Exposure"

On 10 November 2022, the term 'deforestation risk' was replaced with 'deforestation exposure' as a measure of the exposure of supply chain actors to deforestation from commodity production based on sourcing patterns.

Improvements in how commodity deforestation exposure is calculated were made on 7 December 2022. Numbers accessed before that date will differ from those accessed after.

For more information, see [Commodity deforestation exposure and carbon emissions assessment](#).

I UNDERSTAND

### Biome Soy deforestation exposure for feed

MATA ATLANTICA < 1ha 6 t CO2 eq.

### Municipality Soy deforestation exposure for feed Gross emissions from soy deforestation exposure for feed

SAO PEDRO DE ALCANT... < 1ha 6 t CO2 eq.

### Comparing companies importing CHICKEN from Brazil in 2016

Trase is a partnership between

In close collaboration with many others.
