

Recent updates to "Deforestation Exposure"

On 10 November 2022, the term **'deforestation risk'** was replaced with **'deforestation exposure'** as a measure of the exposure of supply chain actors to deforestation from commodity production based on sourcing patterns.

Improvements in how commodity deforestation exposure is calculated were made on 7 December 2022. Numbers accessed before that date will differ from those accessed after.

For more information, see [Commodity deforestation exposure and carbon emissions assessment](#).
